

The do not call list currently in effect in the state of NJ is a great success. No one should ever be bothered at home by unwanted sales calls. I have never purchased anything or donated anything due to the receipt of a phone call, and I never will. An unsolicited phone caller always masks his/her identity, and therefore cannot be trusted. Therefore, I should not have to have my dinner, my sleep time (during the day for the elderly), my family time (reading to my children) or ANY OF MY TIME interrupted by an unwanted, unsolicited waste of my time. When my phone rings, I want to know all the time that it is either someone I know and want to talk to, or a wrong number. I shouldn't have to pay more for phone services to have caller id, etc.
